THE ELEGANCE OF SAUVIGNON BLANC GRAPES

Rosana Madrid Romero dedicates this special Collection of young wines to her mother Mercedes Romero and her daughter Martina Madrid. Three women represented by the Lily, a flower that means elegance, beauty and simplicity.

3 Calas Madrid Romero Blanco is a wine that represents the elegance of Mercedes Romero, the first generation of the family. Light and fresh, this white wine is the best choice to enjoy its floral & fruity aromas.

VINEYARDS

Bodega Madrid Romero grows a 7,65 ha. Vineyard of Sauvignon Blanc grape variety in a sandy and spongy land with stones that help to retain moisture at night, preventing the grape from suffering water stress during the day, on hot summer days that reach extreme temperatures between 43 and 45 centigrade. The care and the daily ripening control due to these high temperatures while the wine making process, has allowed us to obtain this great young wine, one of the best of the 1001 Flavors Region of Murcia made with this grape variety.

WINEMAKING

From the middle of August, the manual harvest of the Sauvignon blanc grapes begins. They are initially selected in the vineyard and transported refrigerated to prevent oxidation. After a second selection in the winery, the grapes are destemmed and crushed, then cold macerated and gently pressed. The clean must is fermented at cold temperature, placing the grapes in small tanks for a 3 day cold pre-maceration that will give the wine acidity and more freshness.

TASTING & PAIRING

This white wine has its best characteristics related with the Mediterranean climate with a high luminosity for the sunny hours and constant winds that clean and dry the humidity of the night. This Sauvignon blanc white wine has an intense and brilliant yellow colour, an intense acidity in the mouth, with a long and persistent flavor, leaving a freshness that joints its aroma of Mediterranean citrus.
